KOVALENKO, 34, M 2026-08-29 14:32 · Stab. point *Sokil*

VITALS

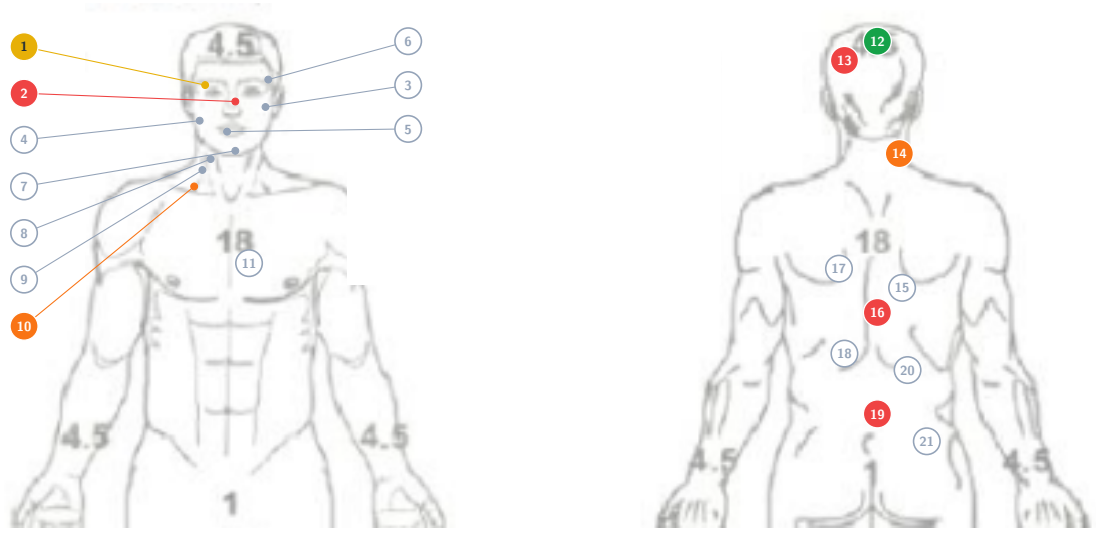

REPORT	BP	HR	SpO_2	RR	GCS	TEMP	CAP REFILL
14:32	**104/62**	**118**	**94%**	**24**	**14**	**36.4 °C**	**3 s**
2026-08-29	MAP 76		RA		E4 V4 M6		

WHAT THE PATIENT SAID — verbatim, no clinician inference

#	Site	Time	Said	Requests
1	POI	11:05	“head hurts, can’t see right”	water
2	CCP	12:40	neck pain turning left	water ×2
3	Stab. Sokil	14:20	**headache worse lying flat**	asks about brother ×2

PULSATILE ANALYSIS

the CSF and venous circuit as 9 compartments and 12 interfaces · colour = status, number = key below

warning · borderline · within ref. · requires evidence · ? not evaluated

The digital twin suggests investigating these zones. Not a diagnosis.

Start with **red**. **Orange** is the model correcting its own arithmetic — not a finding in this patient. Grey was not measured at all.

COMPONENT KEY

1 Cerebral arterial	w 0.39	8 Sinus to jugular bulb	?	15 Vertebral plexus	?
2 Intracranial CSF	**w 0.63**	9 Jugular bulb	?	16 Spinal dural sac	**w 0.63**
3 Cerebral venous	?	10 Internal jugular	**NEEDS EVIDENCE**	17 Azygos return	?
4 Arteriolar bed	?	11 Systemic venous	?	18 Paravertebral	?
5 Capillary bed	?	12 Dural sinus	w 0.11	19 CSF absorption, spinal	**w 1.53**
6 Cerebral venous outflow	?	13 CSF absorption, cranial	**w 1.53**	20 Plexus drainage	?
7 Craniospinal CSF channel	?	14 Vertebral collateral	**NEEDS EVIDENCE**	21 Plexus shunt	?

w = how far outside the normal band, 1.0 = at the danger bound. **13 of 21 parts show ? — not measured, which is not the same as normal.** The two requires-evidence parts are the model correcting its own arithmetic and are **not statements about this patient**.

Component weights and the artefact call are real output for recording 081. **Name, age, sex, vitals and transcript are synthetic.** Not a diagnosis — confirm before acting.
